

The image shows a detailed cross-section of a multi-pane window or door assembly. It features three glass panes held together by black spacers. The entire unit is housed within a white PVC profile system. The profile has a complex internal structure with multiple chambers, including a large red cavity at the bottom. A blue component is visible in the middle of the profile, likely a drainage or ventilation system. The bottom of the profile shows a red channel and a small black component, possibly a roller or seal. The background is white with blue geometric shapes on the left and right sides.
